Eric, (b) (6) and will contact Marla Harrison (Port's Marine Env Mgr) to see why EPA was not notified. I was under the impression that EPA was engage with through the application process. I agree that LWG members should set the standard, and will get to the bottom of this. Jim.

Jim, the AOC requires LWG members to notify EPA dredging activities - see Section 6, Task 4 from the SOW below.

Section 6 Task 4 - Dredging Coordination

Respondents will notify and consult with EPA prior to Respondents undertaking any dredging activities at the Site during implementation of the AOC. (See Subtask 2a, 5.) The notification shall include information regarding the nature and scope of the dredging activity, proposed schedule, potential environmental impacts, and coordination with the RI/FS. The notifications in this paragraph shall be updated annually or as necessary to account for Respondents new dredging activity.

We understand that the dredging activities described below are being undertaken through a multi-year permit issued in 2001.

As you are aware, dredging coordination has been an ongoing issue for the project. We expect LWG members to set the standard on this. It is unclear why we were not notified.

Eric

Subject: Dredging at Port of Portland's Marine Terminal 2

All,

We are starting to dredging at Terminal 2 today and would like to invite you to visit the site during dredging operations. Terminal 2 is located close to downtown Portland and offers a unique opportunity to see clamshell dredging at a marine terminal first-hand.

Please let me or Michelle (503-240-2032) know if you would like to visit and we would be happy to make arrangements. Please let me know as soon as possible if you would like to see dredging operations at Terminal 2.

Thank you.

Marla
